

Get rid of unwanted moisture and keep your area clean and fresh with our portable desiccant dehumidifier

- Ideal for small to medium-sized areas
- Portable carry handle
- Washable dust filter
- Adjustable air flow
- Timer function
- Different drying modes
- Laundry function
- Removable tank
- Permanent drain option
- Auto restart after power outage
- Auto switch off if the unit is knocked over

WAVELINE

Desiccant dehumidifiers are perfect for eliminating excess moisture in areas that mould is a problem. They are more efficient and effective than compressor dehumidifiers in areas where the average temperature is 10°C or lower.

These dehumidifiers are great for use in boats, caravans, holiday homes, sheds, garages, storage areas, basements, and other cold, mouldy and challenging environments.

Fresh clothes like they have been dried outside

The internal temperature of the desiccant dehumidifier is up to 150°C, which can dry and sterilize your clothes at the same time.

Portable and light weight

With a convenient carry handle, it is easy to lift the machine with one hand.

Washable dust filter

With a removable washable dust filter it can purify the large particles in the air.

Adjustable air flow

With its automatic air flow, you can adjust the angle from 0-90°

User-friendly operating modes

A simple to use control panel in order to improve the efficiency

Moisture

High / Mid / Low

Timer

2h / 4h / 8h

Humidity

50% / 60% / Auto

The WL-DD7 dehumidifier uses the principle of active dehumidification, which is not affected by the ambient temperature.

With excellent dehumidification performance, it can dehumidify in temperatures under -5°C to achieve strong dehumidification regardless of the season.

$-5^{\circ}\text{C} - 50^{\circ}\text{C}$
